

JetPeel Treatment Description:

****Pre-Treatment:****

Before the JetPeel treatment, your skin will be cleansed to remove any makeup, dirt, or oil. There's no need for anesthesia or numbing cream, as the procedure is painless. It's important to avoid direct sun exposure, harsh exfoliants, or treatments that could irritate the skin at least a few days prior. Your aesthetician may recommend specific products to prepare the skin for optimal results.

****Post-Treatment:****

After the JetPeel treatment, your skin will feel refreshed, hydrated, and glowing. There's minimal to no downtime, so you can return to your regular activities immediately. You may experience mild redness, but it typically subsides within a few hours. It's essential to keep the skin hydrated, avoid direct sun exposure, and use a high-SPF sunscreen to protect the skin. Your aesthetician will provide post-care instructions and may recommend soothing serums or moisturizers to maintain the results.
